Merycoidodon

Merycopotamus

Messelobunodon

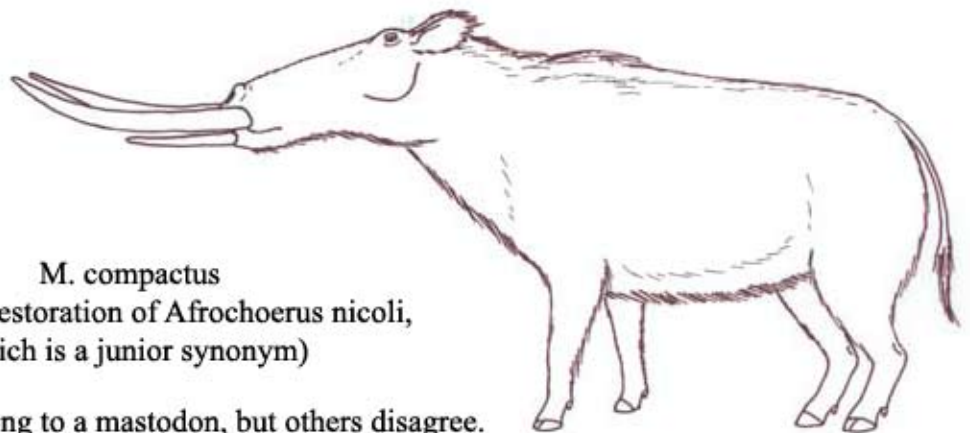

Metridiochoerus

M. andrewsi

M. jacksoni

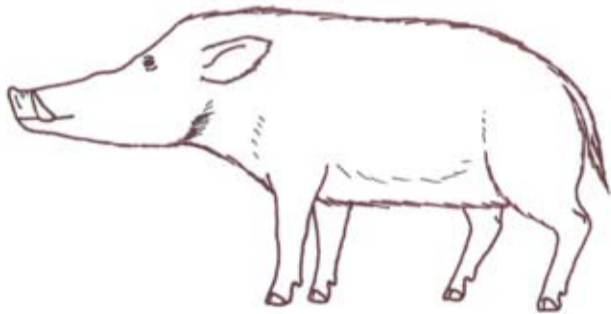

M. compactus
(based on restoration of Afrochoerus nicoli,
which is a junior synonym)

The tusks were thought to belong to a mastodon, but others disagree.

If they are inaccurate in the position as presently restored, but still a part of this animal, they may be angled in a manner closer to the other two examples above.

Microstonyx

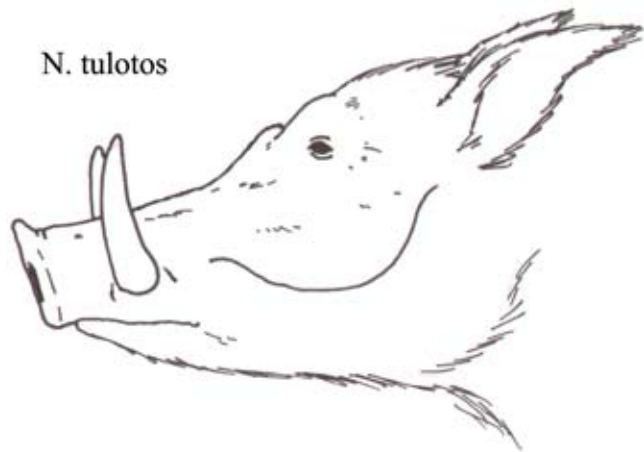

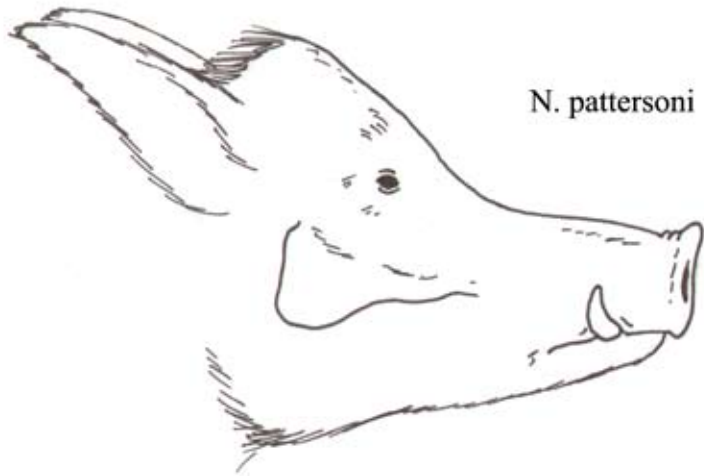

Notochoerus

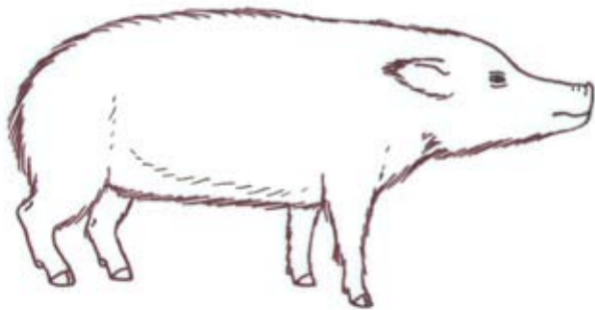

N. euilus

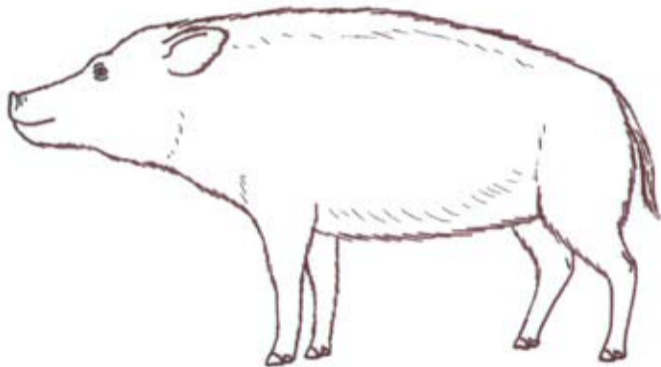

Nyanzachoerus

Palaeochoerus

Perchoerus

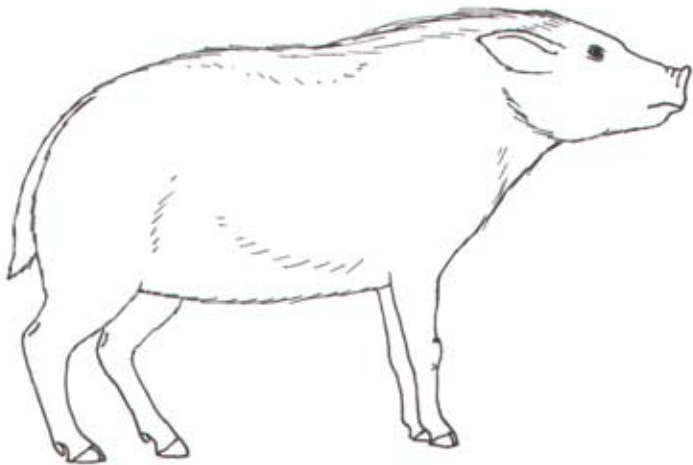

Phacochoerus

P. modestus

Platygonus

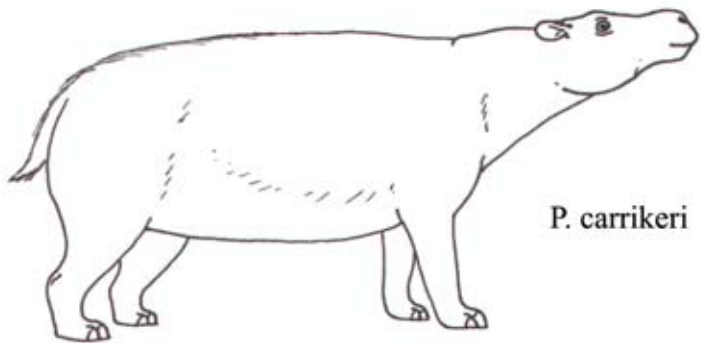

Potamochoeroides

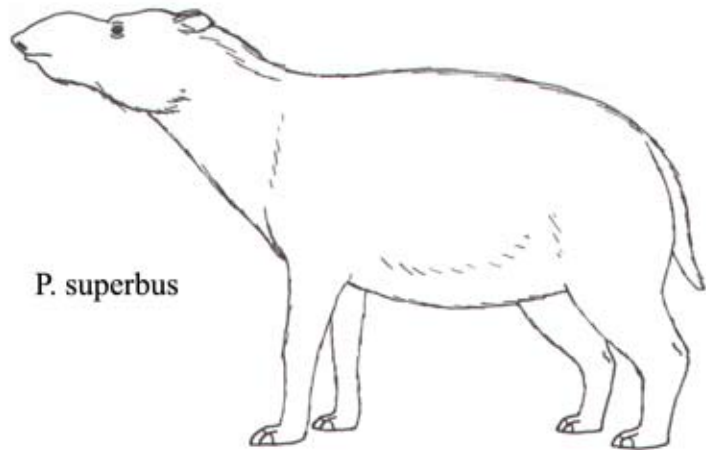

P. shawi

Promerycochoerus

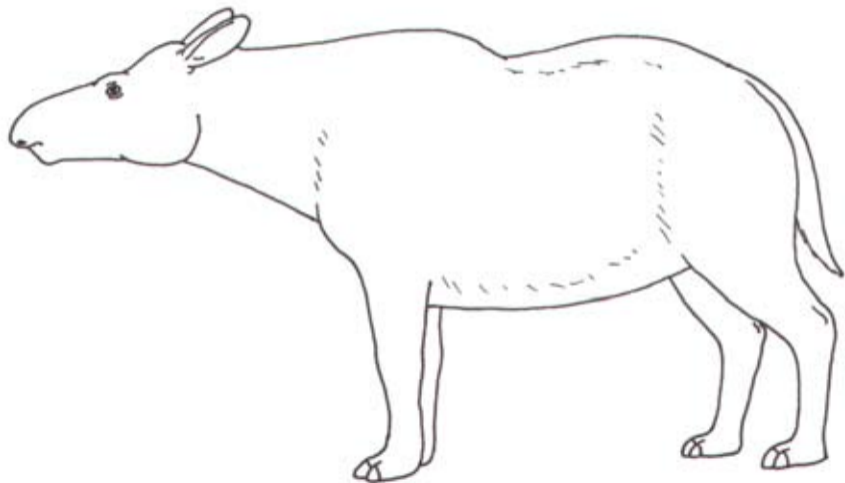

P. carrikeri

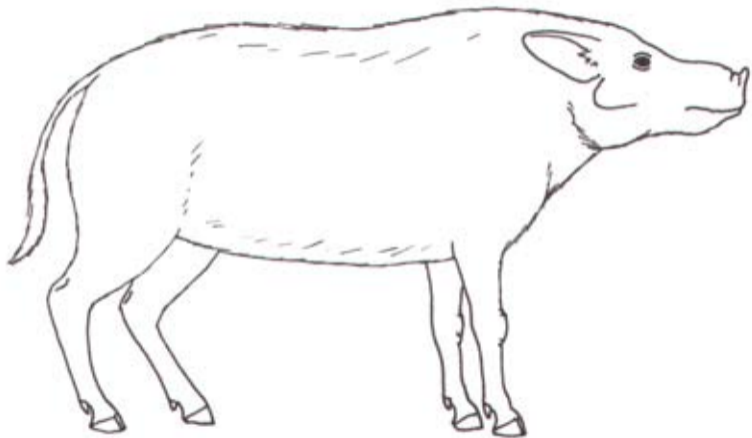

P. superbus

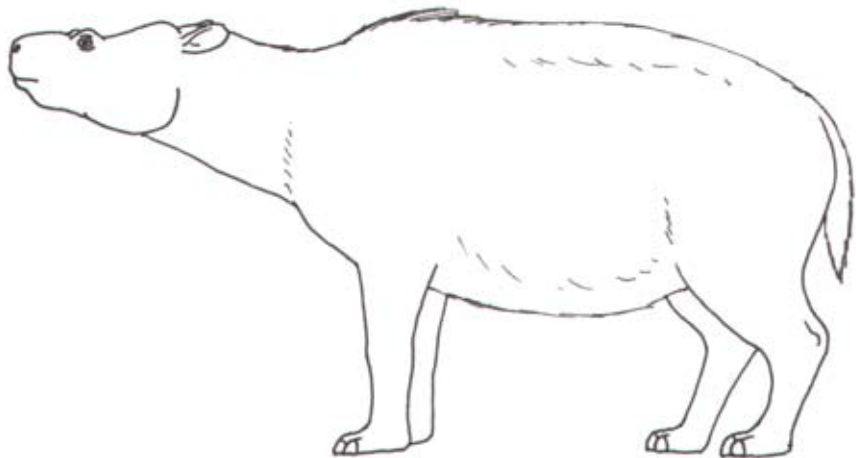

Promerycion

Prosthennops

Ticholeptus
